#### TEST STRING

[SWITCH TO UNIT TESTS >](#)

I want to summarise the information  
I don't find the word summarite in the  
dictionary  
But Americans use summarize instead

I

#### EXPLANATION

▼ "summar[i]e" gmi

summar[i] matches the characters **summar** literally (case insensitive)

▼ Match a single character present in the list below **[sz]**

**s** matches a single character in the list **sz** (case insensitive)

**e** matches the character **e** literally (case insensitive)

▼ Global pattern flags

**g** modifier: global. All matches (don't return after first match)

**m** modifier: multi line. Causes **^** and **\$** to match the begin/end of each line (not only begin/end of string)

**i** modifier: Insensitive. Case Insensitive match (ignores case of **summar**)

#### MATCH INFORMATION

Match 1

Full match 10-19 summarise

Match 2

Full match 104-113 summarize
